It's beautiful.**

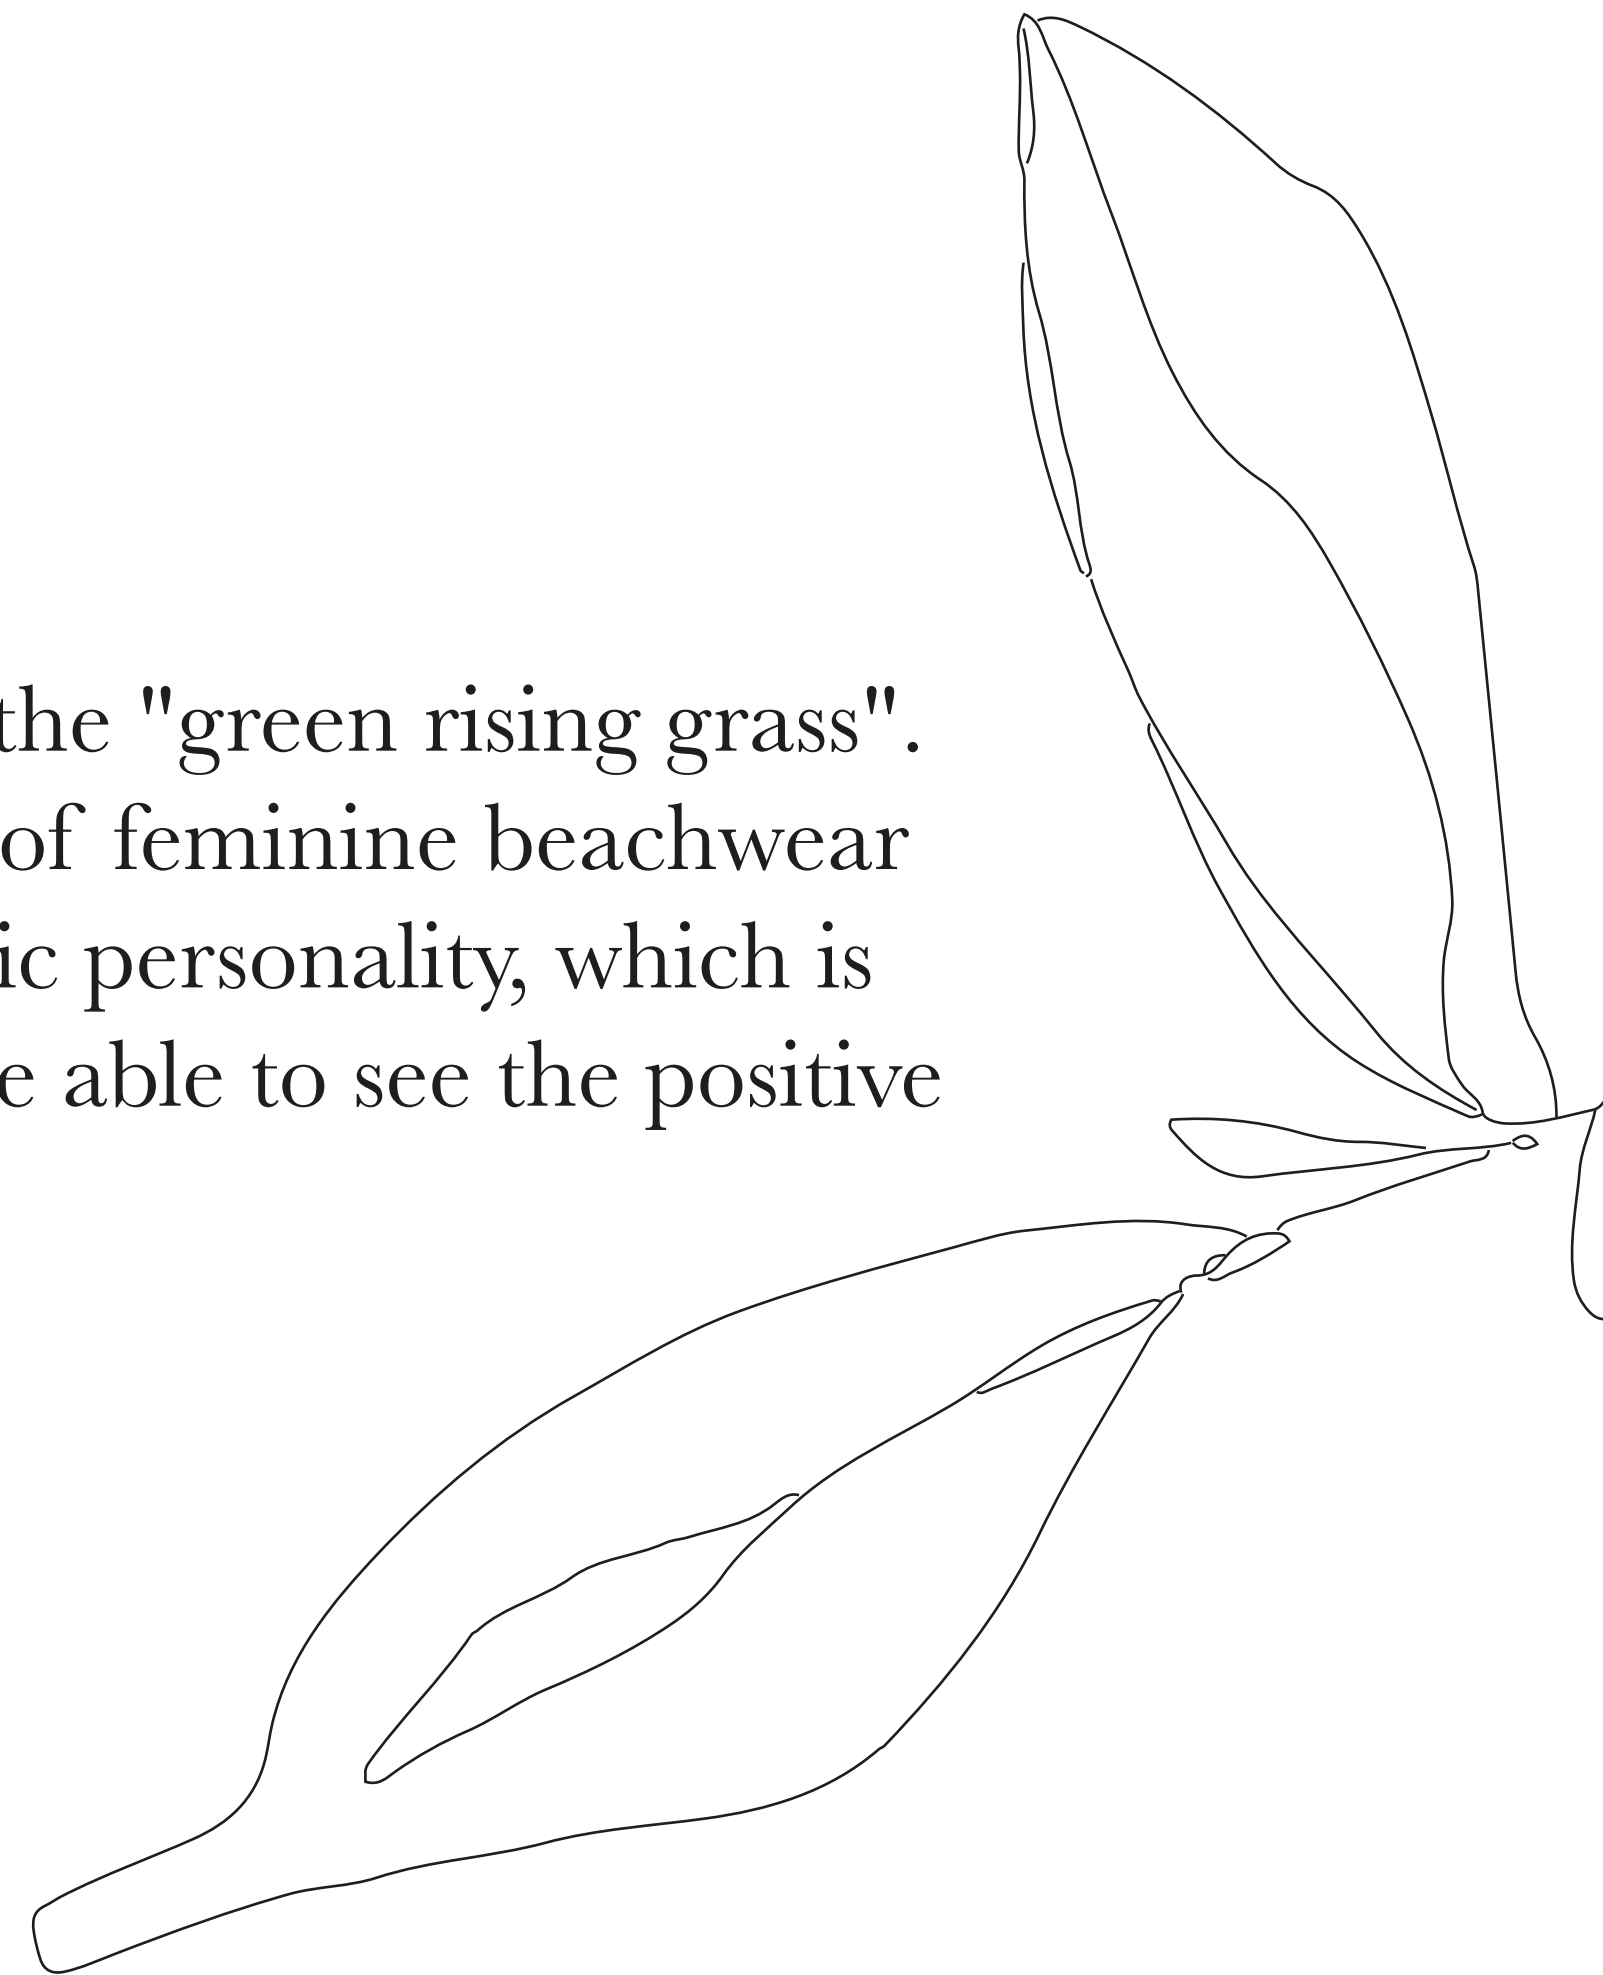

# Cloe

/wəɪd/

Cloe represents the "green rising grass". It is a collection of feminine beachwear with an optimistic personality, which is used to always be able to see the positive side of things.

# The Brand

In December of 2018, the Colombian designer Daniella Batlle (@daniellabatlle) released her new resortwear & beachwear brand 3LL By Daniella Batlle (@3llbydb). The latter was created under the concept: “Designer’s Clothing at an Affordable Price.”

Moreover, this new proposal maintains three of the most important features of its mother brand which are designer fashion offer, top-quality handfinished garments and differentiating textiles (exclusive prints).

The most distinguishing characteristic of our brands has always been our graphic design, thereby we decided to collaborate with different graphic designers in each collection. In the current one, the prints were specially made by @giannyfili.

Nowadays, the brand is present in 12 countries in South, Central & North America & Europe.

# Sustainability

Our textile supplier, Sutex, is a company focused on effective, sustainable and responsible environmental processes.

Cloe SS21 uses fibers that reuse plastic bottles, thus avoiding further pollution of the world's rivers, seas and oceans, and its digital printing process uses 0% water.
